Tabs are achieved by using the USWDS Button Group component

Titles above tables should be styled table captions. We've resized them from their default sizing to 1.438rem (23px)

Tables should be implemented using the USWDS class: "usa-table usa-table--striped"

Paginate each table  
 after 5 data rows.  
 Implement the USWDS  
 Pagination component.

A11y read should include current page context (as demoed in HTML Table Paginator)

Clicking a file name should trigger a download of the clicked file.

Downloaded file names should include the date/time stamp after the original filename
